Specialist development technologies for the web and integration of multimedia content (pictures, 3D scenes mobile development with Android).

## Projects

### Untitled Music Project

*Jan 2022 - Present*

This music social platform help users to meet new people all over the world, find people with similar musical tastes, stay updated with the latest news regarding our favorite artists, listen to our favorite artist podcasts, watch and discover new live stream from the safety of our home, and more...

This project is developed using languages like Typescript and React as well as frameworks like LoopBack.io and Next.js.

This project is hosted on AWS platform, use Serverless technologies like Lambda and multiple other AWS services.
